GitHub: github.com/ashishlikhith
Email: ashishlikhith@gmail.com
Mobile: +91 6309441639

## Skills

- **Languages**: C, C++, Python, Java
- **Frameworks**: HTML, CSS
- **Data Skills**: Data Cleaning, Exploratory Data Analysis EDA, Data Visualization, ML Basics
- **Tools/Platforms**: MySQL, Visual Studio Code, Jupyter Notebook, Excel, Powe BI, GitHub
- **Libraries**: Pandas, Numpy, Seaborn, Matplotlib, Sckit-learn
- **Soft Skills**: Problem-Solving, Team Player, Adaptability, Leadership

## Projects

**Global Sales Dashboard | GitHub** Mar' 25 – May' 25

- Built an interactive Excel dashboard using Pivot Tables, Pivot Charts, and Slicers to analyse global sales across countries, brands, industries, and sales representatives.
- Created dynamic visual insights with year and month filters to track sales trends, regional performance, and support trend analysis.
- Reviewed top-performing countries Korea, Singapore, China, best sales reps Rose, Jenny, leading brands Gamma, Beta, and strong industry segments Banking, Electronics.
- Strengthened expertise in data visualization, business intelligence, achieving **90% accuracy** and Excel-based analytical reporting through hands-on dashboard development

  **Tech Stacks Used**: Microsoft Excel

**Student-Performance Analysis | GitHub** Feb' 25 – Apr' 25

- Conducted an in-depth analysis of NYC polling site data using Pandas, NumPy, Matplotlib, and Seaborn.
- Performed data cleaning, geolocation extraction, and classification of polling site types across all five boroughs.
- Analysed ZIP-code patterns, borough-wise distribution, and accessibility features to identify infrastructure and coverage gaps.
- Implemented predictive analysis with visual insights, achieving **85% accuracy** in polling site classification to support civic and urban planning decisions.

  **Tech Stack Used**: Python, Numpy, Pandas, Matplotlib

## Training

**LPU - A Hands-on Approach / Data Science | Certificate** Jun' 25 – Jul' 25

- Collected, cleaned, and organized avocado ripeness datasets to ensure data accuracy and consistency.
- Used Python Pandas, NumPy and SQL to analyse ripeness conditions and identify key influencing factors.
- Identified trends and patterns across different maturity stages through data analysis.
- Assessed interactive dashboards in Excel and Power BI to present insights and support data-driven decisions.
- Explored Predictive analysis on avocado ripeness patterns, achieving **80% accuracy** in identifying maturity stages using data-driven methods.

  **Tech Stack Used**: Python, Numpy, Pandas, Matplotlib, Microsoft Excel, Power BI

## Certificates

- Build Generative AI Apps and Solutions with No-Code Tools - Infosys | **Link** May' 25
- Google Hackathon - Google | **Link** Oct' 23
- Responsive Web Design - Free code camp | **Link** Aug' 23

## Achievements

**Qualified Third Round – Google Hackathon:** Aug' 24

- Selected for the third round for demonstrating innovative project design and technical implementation.

## Education

- **Lovely Professional University** Phagwara, Punjab
  *Bachelor of Technology - Computer Science and Engineering;* ***CGPA: 7.59*** *Since Aug' 23*
- **Sri Viswa Junior College** Visakhapatnam, Andhra Pradesh
  *Intermediate;* ***Percentage: 89%*** *Jun' 22 – May' 23*
- **Bhashyam High School** Visakhapatnam, Andhra Pradesh
  *Matriculation;* ***Percentage: 100%*** *Jun' 19 – Mar' 20*
